

# DO NOT USE until the week of OCT. 14, 2024

## Cart Placement Instructions

- Front of the cart should face the street.
- Wheels and handle should face the home.
- Containers should be set parallel to the curb, spaced 3 feet apart.
- **DO NOT** place containers within 3 feet of parked cars, fire hydrants, light poles, street signs or low-hanging trees.
- When snow is present, place them on a cleared, flat area.

There will be some overlap between the time the new carts are delivered and when City staff will be equipped to start collecting them at the curb. The City expects to begin automated collection the week of Oct. 14. Please continue using your existing bins and following the rules currently in place until then. The new carts will NOT be collected until we have the trucks capable of lifting them.
